

Dr. V. Novosad, Senior Scientist, Argonne National Laboratory, USA.

B. Verkin Institute for Low Temperature Physics & Engineering (ILTPE) is a jewel in the crown of research institutions of the National Academy of Sciences of Ukraine. It is known internationally for its breakthrough achievements in the fields of fundamental and applied mathematics, experimental and theoretical condensed matter physics, in particular in magnetism, superconductivity and low temperature spectroscopy, soft matter and biophysics, as well as in cryogenics R&D. I was privileged to be part of the ILTPE team as a Ph.D. student. I am very grateful to my colleagues from ILTPE for their guidance and support that helped me to launch a scientific career and shaped me as a researcher.
