

LIST OF PUBLICATIONS by Leonid PASTUR

1. On the dislocation model of a twin (with A.Kosevich). Fiz. Tverd. Tela (Solid State Physics), 3, 1290-1297 (1961) (Russian).
 2. Form a thin twin (with A.Kosevich). Fiz.Tverd.Tela (Solid State Physics),, 3, 1871-1875 (1961).
 3. Fields of dislocation in an anisotropic and inhomogeneous medium (with E.Feldman, A.Kosevich, V.Kosevich). Fiz. Tverd. Tela (Solid State Physics), 4, 2585-2592 (1962)
 4. Relation between the dislocation theory of twins and the macroscopic theory of I.Lifshitz (with A.Kosevich). Fiz.Tverd.Tela (Solid State Physics), 5, 1970-1978 (1963).
 5. Dislocation description of the plastic deformation in the strip (with V.Bojko and E.Feldman). Fiz.Tverd.Tela (Solid State Physics), 8, 2986-2993 (1966).
 6. Fields of dislocation and linear charges in piezoelectric crystals (with A.Kosevich and E.Feldman). Kristallografia, 12, 916-923 (1967).
 7. The eigenvalue distribution in some ensembles of random matrices (with V.Marchenko). Matem. Sborn., 72, 507-536 (1967).
 8. On the average number of states in some model problem (with M.Bendersky). Zh.Eksp.Teor.Fiz.(JETP), 57, 284-294 (1969).
 9. On the spectrum of the one-dimensional Schrodinger equation with a random potential (with M.Bendersky). Matem.Sborn., 82, 273-282 (1970).
 10. On the Shrodinger equation with a random potential. Teor.Matem.Fiz., 6, 415-424 (1970)
 11. On the spectrum of random matrices. Teor.Matem.Fiz., 10, 102-112 (1972).
 12. On the eigenvalue distribution of the Schrodinger equation with a random potential. Funk.Anal., Priloz., 6, 93-94 (1972).
 13. On the elastic deformation due to the epitaxial crystal growth (with E.Feldman). Fiz.Tverd Tela (Solid State Physics), 14, 2689-2692 (1972).
 14. * ¹ Spectra of random self-adjoint operators. Russian Mathematical Surveys, 28, 1-67 (1973).
 15. On the existence and continuity of the pressure in the quantum statistical mechanics. Teor. Matem. Fiz., 14, 211-218 (1973).
- ¹here and below "*" denotes reviews and books
- 1
16. Spectral theory of the Kirkwood-Zalzburg equation in a finite volume. Teor. Matem. Fiz., 18, 233-242 (1974).
 17. On the wave transmission coefficient for a thick layer of a randomly inhomogeneous medium (with E.Feldman). Zh.Eksp.Teor.Fiz.(JETP), 67, 487-493 (1974).
 18. * Energy spectrum of quasiparticles in one-dimensional disordered systems (with S.Gredeskul). Fiz.Nizkikh Temp. (Low Temper.Physics), 1, 277-317 (1975).
 19. On the behavior of the density of states near the spectrum edges of one-dimensional disordered systems (with S.Gredeskul). Teor.Matem.Fiz., 23, 132-139 (1976)
 20. On the asymptotic behavior of solution of second order equation with random coefficient (with M.Bendersky). Teor.Funk.,Funk.Anal.,Primen., 22, 3-10, (1976).
 21. * Fluctuation levels in disordered systems (with S.Gredeskul and I.Lifshitz). Fiz. Nizkikh Temp. (Low Temper.Physics), 2, 1043-1130 (1976)
 22. Exactly soluble model of a spin glass (with A.Figotin). Pisma Zh. Eksp. Teor. Fiz. (JETP Letters), 25, 348-353 (1977).
 23. The random Schroedinger operator has a pure point spectrum (with I.Goldsheidt and S.Molchanov). Funk.Anal.,Priloz., 11, 1-10 (1977)
 24. On the spin glass model (with A.Figotin) Fiz. Nizkikh Temp. (Low Temper.Physics), 3, 378-385 (1977).
 25. Behavior of some Wiener integrals for large times and the density of states of the random Schrodinger equation. Teor.Matem.Fiz., 32, 88-95 (1978).
 26. On the theory of disordered spin systems (with A.Figotin). Teor.Matem.Fiz., 35, 193-204

(1978).

27. Density of states of one-dimensional disordered systems in the two-band approximation (with S.Gredeskul). Zh. Eksp. Teor. Fiz. (JETP), 75, 1444-1454 (1978).
28. Spectral properties of disordered systems in one-body approximation. Commun. Math. Phys., 75, 179-196 (1978).
29. On singular interaction potentials in the quantum statistical mechanics (with V.Zagrebnov). Teor.Matem.Fiz., 36, 352-372 (1978).
30. Localization of states and kinetic properties of one-dimensional disordered systems (with T.Antsygina and V.Slusarev). Fiz.Nizkikh Temp. (Low Temper.Physics), 7, 5-44 (1981).
31. * Introduction in the theory of disordered systems (in Russian) (with S.Gredeskul and I.Lifshitz). Moscow, Nauka, 1982, 360 pp.
- 2
32. Disordered spherical model. J.Stat.Phys., 27, 119-151 (1982).
33. On the infinite range limit in the theory of disordered spin system (with A.Figotin). Teor.Matem. Fiz., 51, 380-388 (1982).
34. On the theory of wave and particle propagation in randomly inhomogeneous media (with S.Gredeskul and I.Lifshitz). Zh.Eksp.Teor.Fiz.(JETP), 82 2362-2376 (1982).
35. Localization in an incommensurate potential: an exactly soluble model (with A.Figotin). Pisma Zh.Eksp.Teor.Fiz. (JETP Letters), 37, 575-577 (1983).
36. On the vacuum instability in a random electric field (with I.Krive). Yadernaya Fiz.(Nuclear Physics), 39, 224-230 (1984).
37. On the positivity of the Lyapunov exponent and the absence of an absolutely continuous spectrum for the Almost-Mathieu operator (with A.Figotin). J.Math.Phys. 25, 774-777 (1984)
38. On the selfconsistent theory of localization (with T.Antsygina and V.Slusarev) Solid State Commun., 51, 301-303 (1984).
39. An exactly soluble model of a multidimensional incommensurate structure (with A.Figotin). Commun.Math.Phys. 95, 401-425 (1984).
40. The infinite range limit for the correlation functions of lattice systems (with M.Shcherbina). Teor.Matem.Fiz., 61, 3-16 (1984).
41. Ergodic properties of the eigenvalue distribution of some classes of random self-adjoint operators (with A.Figotin). Selecta Math.Sovetica, 3, 69-86 (1984)
42. On the spectral theory of some class of the Schrodinger operator with a limit periodic potential (with V.Tkachenko). Doklady Akad.Nauk SSSR, 279, 1050-1053 (1984).
43. Spectral characteristics of the impurity band in a model of the structural disorder (with S.Gredeskul). J.Stat.Phys., 38, 37-69 (1985).
44. Works of I.Lifshitz on disordered systems (with S.Gredeskul). J.Stat.Phys., 38, 25-36 (1985).
45. Density of states near the spectrum edges of one-dimensional incommensurate systems (with S.Gredeskul). Teor.Matem.Fiz., 62, 316-319 (1985)
46. Wave transmission coefficient for random homogeneous medium (with A.Marchenko). Usp. Matem. Nauk, 40, 213-214 (1985).
47. Absorption of the random signal in superconductors (with E.Bratus', S.Gredeskul and V.Shumeiko). Fiz. Nizkikh Temp.(Low Temp.Phys.), 12, 1092-1094 (1986).
- 3
48. Wave and particle propagation through long random barriers (with A.Marchenko). Teor. Matem. Fiz., 68, 433-448 (1986).
49. On the pure point spectrum of one dimensional Anderson model with the Gaussian potential. Preprint Karl-Marx University, 1985, 23 pp.
50. Spectral properties of one dimensional finite-difference and random operators. In: Proc. First Bernoulli Soc.Congress, Moscow, Nauka, (1986).
51. Spectral properties of the metrically transitive operators and related problems. In: Proc.of Int.Congr.of Math.,AMS, Providence, 1296-1311 (1986).

52. * Spectral theory of random self-adjoint operators. In: *Itogi Nauki i Techn., Teor.Ver.*, 25, 3-67 (1987).
53. Lower bounds on the Lyapunov exponent of some finite-difference equations with quasi-periodic coefficients.
In: *Operators in Infinite-Dimensional Spaces and the Function Theory*, Kiev, Naukova Dumka, 3-13 (1987).
54. On some generalization of the superconductivity model with localized pairs (with V.Slusarev). *Fiz.Nizkikh Temp.(Low Temper. Phys.)*, 13, 1092-1094 (1987).
55. Restoring of the chiral symmetry by a stochastic external field (with I.Krive and A.Rozhavsky). *Yadernaya Fiz. (Nuclear Physics)*, 46, 1297-1304 (1987).
56. Phase transition in quantum models of rotators and ferroelectrics (with B.Khoruzhenko). *Teor. Matem.Fiz.*, 73, 111-124 (1987).
57. * Spectral Properties of Random and Almost Periodic Operators
In: *Soviet Mathematical Physics Reviews*, by S.Novikov (Ed.), Harwood Acad.Publisher, London 6, 2-112 (1987).
58. Polarization of the vacuum by a stochastic external field (with I.Krive and A.Rozhavsky). *Yadernaya Fiz.(Nuclear Physics)*, 47, 587-598 (1988).
59. On the spectral theory of the Schrodinger operator with aperiodic complex potential (with V.Tkachenko). *Funk.Anal.Prilozh.*, 22, 85-86 (1988).
60. An example of the multidimensional Schroedinger operator with a nonlocal quasi periodic potential and overlapping point and absolutely continuous spectra (with A.Figotin). *Teor.Funk., Funk.Anal.Primen.*, 49, 94-101 (1988).
61. * Introduction in the Theory of Disordered Systems (with S.Gredeskul and I.Lifshitz). New York, Wiley, 1988, 476 pp.
62. Quantum dynamics of quasiparticles in a stochastic field and nonlinear dissipation of wave packets (with E.Bratus', S.Gredeskul and V.Schumeiko). *Phys.Letters*, 131, 449-453 (1988).
63. The quasi-particles dynamics in a non-stationary random field (with E.Bratus', S.Gredeskul and V.Schumeiko). *Teor. Matem. Fiz.*, 76, 401-417 (1988).
- 4
64. Spectral theory of the one-dimensional Schroedinger operator with a limit periodic potential (with V.Tkachenko). *Transact. of Moskow Math.Soc.*, 51, 115-166 (1988).
65. Random and almost periodic operators: new examples of spectral behavior. In: *Proc.of IXth IAMP Congress*, A.Truman (Ed.), Bristol, A.Hilger, 350-353 (1989).
66. One-dimensional scattering problem for random potential and kinetic properties of disordered systems.
In: *Stochastic Methods in Math. and Phys.*, V.Karvovski, R.Gielerak (Eds.), Singapore, World Sci. Publ., 240-250 (1989).
67. Aleksei Vasilevich Pogorelov (on the occasion of his seventieth birthday) (with Marchenko V. A., Maslov K. V., Milka A. D., Mitropolskii Yu.A., Ostrovskii I. V.) *Ukrain. Mat. Zh.*41, 388 (1989) (Russian).
68. Limit theorem for a sum of exponentials. *Math.Notes*, 46, 712-716 (1989)
69. Polarization of the vacuum by a stochastic field and phase transitions in relativistic systems (with I.Krive, and A.Rozhavsky). *Annals of Phys.*, 194, 94-125 (1989)
70. On the wave transmission coefficient for one-dimensional random barriers. (with A.Marchenko and S.Molchanov). *Teor. Math. Phys.*, 81, 1096-1106 (1989).
71. Large- n limit of the Heisenberg model: the decorated lattice and the disordered chain (with B.Khoruzhenko and M.Shcherbina). *J.Stat.Phys.* 57, 41-52 (1989).
72. Transmission properties of the two-band dispersion disordered media (with S.Gredeskul and P.Seba). *J.Stat.Phys.* 58, 795-816 (1990).
73. Schroedinger operator with a nonlocal potential whose absolutely continuous and point spectra coexist (with A.L.Figotin). *Commun.Math.Phys.*, 130, 357-380 (1990).

74. L.Shubnikov. Short Biography (with B.Verkin, Yu.Freiman, S.Gredeskul, and Yu.Khramov). In: L.Shubnikov: Selected Works, Reminiscences (Russian), B.Verkin (Ed.), 5–19, Kiev, Naukova Dumka (1990).
75. L.Shubnikov. Short Review of Scientific Works (with B.Verkin, Yu.Freiman, S.Gredeskul, and Yu.Khramov). In: L.Shubnikov: Selected Works, Reminiscences (Russian), B.Verkin (Ed.), 20–42, Kiev, Naukova Dumka (1990).
76. The large-time asymptotics of some Wiener integrals and the interband light absorption coefficient (with W.Kirsch). Commun.Math.Phys., 132 , 365–382 (1990).
77. One-dimensional Schroedinger operator with an unbounded potential: pure point spectrum (with W.Kirsch and S.Molchanov). Funct.Anal., Appl., 24, (1990) 176–186.
- 5
78. History of the discovery of the Shubnikov-de Haas effect (with B.Verkin, S.Gredeskul, and Yu.Freiman). Soviet J.Low Temperature Physics, 16, 1203–1215 (1990).
79. Inverse problem for a certain class of one-dimensional Schroedinger operators with a complex valued periodic potential (with V.Tkachenko) Math.USSR Izvestia., 37, 611–629 (1991).
80. Absence of self-averaging of the order parameter in the Sherrington-Kirkpatrick model (with M.Shcherbina) J.Stat.Phys., 62, 1–19 (1991).
81. Wave and particle propagation in one-dimensional and quasi one- dimensional random media. Lectures in Appl.Math., 27, 417–428 (1991).
82. Spectral analytical approach to ADALINE learning for neural networks (with H.Englisch) In: Neurocomputers and Attention, A.Holden, V.Krylov (Eds.) Manchester Univ.Press, Manchester, 517–522 (1991).
83. Backscattering enhancement by an impedance rough surface (with T.N.Antzygina, V.Freylikher, S.Gredeskul and V.Slyusarev) J. of Electromagnetic Waves and Appl., 2 , 113–120 (1991).
84. On the geometry of spectrum of one-dimensional Schrodinger operator with a complex-valued periodic potential (with V.Tkachenko) Math.Notes, 50, 1045–1050 (1991).
85. Lev Shubnikov, un genio de las bajas temperaturas (with Yu.Freiman, S.Gre deskul and B.Verkin) Rivista Espanola de Fisica, 5 , 58–63 (1991).
86. On the density of states of random band matrices (with L.Bogachev and S.Molchanov) Math.Notes, 50, 1232–1245 (1991).
87. Large time behaviour of moments of fundamental solutions of the random parabolic equation (with W.Kirsch). In: International Series of Numerical Mathematics, 102, 127–132 (1991).
88. * Spectra of Random and Almost Periodic Operators (with A.Figotin) Spriger Verlag, Berlin-Heidelberg, 1992, pp.587
89. Vladimir Aleksandrovich Marchenko (with Berezanskii Yu.M., Maslov V.P., Mitropolskii Yu.A., Sinai Ya.G.) Russian Math. Surveys, 47, 239–242 (1992)
90. An eigenvalue distribution of band random matrices (with S.Molchanov and A.Khorunzhy). Teor. Math. Phys., 90, 108–118 (1992).
91. Statistical physics and spectral theory of disordered ssystems: some recent developments. In: Mathematical Physics X (Proc. of X-th Congress in Mathematical Physics), K.Smudgen (Ed.), Springer Verlag, Heidelberg, 70–86 (1992).
92. One-dimensional localization and wave propagation in linear and nonlinear media (with S.Gredeskul). In: Nonlinearity with Disorder, A.Bishop and S.Pneumaticos (Eds.) Springer Verlag, Heidelberg, 126–133 (1992).
- 6
93. * Large-n limit in the statistical mechanics and the spectral theory of disordered systems (with A.Khorunzhy, B.Khoruzhenko and M.Shcherbina). In: Phase Transitions and Critical Phenomena, C.Domb, J.Lebowitz (Eds.), Academic Press, N.Y. 15, 74–239 (1992).

94. On the phenomenological approach in the localization theory (with T.Antzygina, V.Slyusarev). *J. Phys. C: Condensed Matter* 4, 6123–6130 (1992).
95. On the universality of the level spacing distribution for some ensembles of random matrices. *Letters in Math. Phys.*, 25, 259–265 (1992).
96. Integrated density of states of the deformed Wigner ensemble (with A.Khorunzhy). *Doklady Acad. Nauk Ukraine (Russian)*, N 12, 21–24 (1992).
97. Large-time behaviour of moments of solutions of parabolic differential equations with random coefficients
In: *Seminaires "Equations aux Dérivées Partielles, Ecole Polytechnique, Paris, XXI.1–XXI.10* (1992).
98. Eigenvalue distribution of random operators and matrices. *Asterisque*, 206, 445–462 (1992).
99. One dimensional Schroedinger operators with high potential barriers (with W.Kirsch and S.Molchanov) In: *Operator Theory: Advances and Applications*, 57, 163–170 (1992).
100. Limits of infinite interaction radius, dimensionality and the number of components for random operators with off-diagonal randomness (with A.Khorunzhy)
Commun. Math. Phys., 153, 605–646 (1993).
101. Leiden and Cambridge, or a short history of the discovery of the Shubnikov-De Haas effect (with B.Verkin, Yu.Freiman, and S.Gredescul).
In: *Memorial Volume of A.Ioffe (Russian)*, 20–38, V.Frenkel (Ed.) *Russian Acad.Sci., St. Petersburg* (1993).
102. On the Kubo conductivity of band matrices (with A.Khorunzhy and W.Kirsch). Preprint *Inst.Low Temp.Phys. N 4, Kharkov*, 1993.
103. On the eigenvalue distribution of the Schroedinger operator whose potential is the sum of a slowly growing and a bounded function (with A.Boutet de Monvel).
C.R. Acad.Sci. Paris, 316, 139–144 (1993).
104. Replica symmetric solution without replica trick for the Hopfield model (with M.Shcherbina, B.Tirozzi). *J. Stat. Phys.*, 74, N5/6, 1185–1194 (1993).
105. Limits of infinite order or dimensionality for random finite-difference operators (with A.Khorunzhy). In: *Operator Theory: Advances and Applications*, 70, 172–189 (1994).
106. The interband light absorption coefficient in the weak disorder regime: an asymptotically exactly solvable model (with W.Kirsch and B.Khoruzhenko).
J.Phys.A: Math. Gen. 27, 2527–2543 (1994).
107. Eigenvalue distribution for some class of random matrices in the limit of their infinite dimensionality (with M.Shcherbina).
Math. Physics, Analysis and Geometry 1, 131–138 (1994).
- 7**
108. On the eigenvalue distribution of the deformed Wigner ensemble of random matrices (with A.Khorunzhy) *Advances in Soviet Mathematics*, 19, 97–127, AMS, Providence (1994)
109. The infinite component limit of the random anisotropy n -vector model. (with B.Khoruzhenko and M.Shcherbina).
Advances in Soviet Mathematics, 19, 269–286, AMS, Providence (1994)
110. $1/n$ -corrections to the Green functions of random matrices with independent entries (with A. Khorunzhy and B. Khoruzhenko).
J. of Physics A: Math. and General, 28, L31–L35 (1995).
111. On the statistical mechanics approach to the random matrix theory: the integrated density of states (with A.Boutet de Monvel, and M.Shcherbina).
J.Stat.Phys., 79, 585–611 (1995).
112. * Particle and wave transmission in one-dimensional disordered systems (with S.Gredescul and A.Marchenko). *Surveys in Applied Math.* 2, 63–166 (1995).
113. Multistability in the stationary scattering problem for a non-linear mean field model (with A.Boutet de Monvel and A.Marchenko).
Mathematical Physics, Analysis and Geometry, 2, 3–12 (1995).
114. On asymptotic property of spectra of sum of one-dimensional random independent operators" (with A.Khorunzhy and V.Vasilchuk).
Dopovidi Acad. Nauk Ukraine (Russian), N2, 22–27 (1995) (Russian).
115. Surface waves: propagation and localisation In: *Journées "Equations aux Dérivées*

- Partielles”, (Saint-Jean-de-Monts, 1995), Exp. No. VI, 12 pp.
116. * Spectral and probabilistic aspects of matrix models.
In: Algebraic and Geometric Methods in Mathematical Physics, 207–242, A. Boutet de Monvel and V. Marchenko (Eds.) Kluwer, Dordrecht (1996).
117. Eigenvalue distribution of random matrices. *Annales Inst. H. Poincaré* 64, 325–337 (1996)
118. Random matrices with independent entries: asymptotic properties of the Green function. (with A. Khorunzhy and B. Khoruzhenko).
J. Math. Phys. 37, 5033–5060 (1996).
119. Universality of the local eigenvalue statistics for a class of unitary invariant matrix ensembles (with M. Shcherbina).
J. Stat. Phys. 86, 109–147 (1997).
120. Localisation of surface states: an explicitly solvable model (with B. Khoruzhenko). *Physics Reports* 288 (1997) 109–125.
121. On asymptotic properties of certain orthogonal polynomials (with S. Alberverio and M. Shcherbina). *Mathematical Physics, Analysis, and Geometry* 4, 263–277 (1997).
122. On the propagation properties of surface waves (with V. Jaksic and S. Molchanov). In: *IMA Vol. Math. Appl.* 96, 145–154, Springer, New York, 1998.
- 8**
123. Asymptotics of the interband light absorption coefficient near the band edges for an alloy type model (with W. Kirsh and H. Stork)
J. Stat. Phys. 92, 1173–1191 (1998).
124. On some asymptotic formulas in the strong localization regime of the theory of disordered systems In: *Operator Theory: Advances and Applications*, 108, 129–148, Birkhauser, Basel, 1999.
125. On the replica symmetric equations for the Hopfield model (with M. Shcherbina and B. Tirozzi) *J. Math. Phys.* 40, 3930–3947 (1999).
126. A simple approach to global regime of random matrix theory
In: *Mathematical Results in Statistical Mechanics*, S. Miracle-Sole, J. Ruiz, V. Zagrebnoy (Eds.), World Scientific, Singapore, 1999, pp. 429–454.
127. Lifshitz tails for random Schrodinger operators with negative singular Poisson potential (with F. Klopp) *Commun. Math. Phys.* 206, 57–104 (1999).
128. Random matrices as paradigm
In: *Mathematical Physics 2000*, 216–266, A. Grigoryan, T. Kibble, B. Zegarlinskii (Eds.), World Scientific, Singapore, 2000
129. A simple approach to global regime of matrix models (with A. Stoyanovich) Preprint, Warwick, 1999.
130. Spectral Properties of Random Selfadjoint Operators and Matrices (A Survey) *Amer. Math. Soc. Transl.* 2, 153–195 (1999).
131. On a heuristic expansion method in the strong localization regime of the theory of disordered systems In: *Applied and Industrial Mathematics*, 173–187, R. Spigler (Ed.), Kluwer, Dordrecht, 2000.
132. On the law of addition of random matrices (with V. Vasilchuk) *Commun. Math. Phys.* 214, 249–286 (2000).
133. On completeness of random exponentials in the Bargmann-Fock space (with G. Chistyakov and Yu. Lyubarskii)
J. Math. Phys. 42, 3754–3768 (2001).
134. Absolutely continuous spectrum and scattering in the surface Maryland model (with F. Bentosela and P. Briet)
In: “Equations Aux Dérivées Partielles” (Plestin des Greves, 2001), Exp. No X, 15 pp.
135. On the asymptotic behavior of correlators of multi-cut matrix models. (with O. Lenoble) *J. Phys. A* 34, L409–L415 (2001).
136. On the $1/n$ expansion for some unitary invariant ensembles of random matrices (with S. Alberverio and M. Shcherbina)
Commun. Math. Phys. 224 271–305 (2001).
137. A class of the multi-interval eigenvalue distributions of a matrix models and related structures (with V. Bulsaev).
In: *Asymptotic Combinatorics and Applications to Mathematical Physics*, 52–70, A. Vershik, V.

Malyshev (Eds.), Kluwer, Dordrecht, 2002.

9

138. Asymptotics of orthogonal polynomials and eigenvalue distribution of random matrices. *Matem. Fyzika, Analiz, Geometriya* 9, 168–187 (2002).
 139. Matrices aléatoires: statistique asymptotique des valeurs propres (with A. Lejay). *Lectures Notes in Mathematics*, 1801, 135–164 (2002).
 140. On the edge universality of the local statistics of matrix models (with M. Shcherbina) *Math. Phys. Analiz, Geom.* 10, 3, 335–365 (2002).
 141. On the spectral and wave propagation properties of the surface Maryland model (with F. Bentosela and Ph. Briet) *J. Math. Phys.* 44, 1-35 (2003).
 142. On the Mott Formula for the AC conductivity and binary correlators in the strong localization regime of disordered systems (with W. Kirsch and O. Lenoble) *J. Phys. A: Math. Gen.* 36, 1257–1289 (2003).
 143. Quasi 1D Localization: deterministic and random potentials (with W. Kirsch, S. Molchanov, B. Vain-berg) *Markov Process. Related Fields* 9 (2003), no. 4, 687–708.
 144. On the thermodynamic limit for disordered spin systems. In: *Geometric aspects of functional analysis*, 243–268, *Lecture Notes in Math.*, 1850, 243–268 (2004)
 145. A random matrix model of relaxation (with J.L. Lebowitz). *J. Phys. A: Math. Gen.* 37, 1517–1534 (2004).
 146. On the moments of traces of matrices of classical groups (with V., Vasilchuk). *Commun. Math. Phys.* 252, 149–166 (2004).
 147. Bose-Einstein condensation in random potential (with O. Lenoble and V. Zagrebnov). *Comptes Rendus Physiques* 5, 129–142 (2004).
 148. Spectral analysis of the generalized surface Maryland model. (with F. Bentosela and Ph. Briet) *St. Peterburg Math. J.* 16, no. 6, 923–942 (2005).
 149. A simple approach to the global regime of Gaussian ensembles of random matrices. *Ukrainian Math. J.* 57, no. 6, 936–966 (2005)
 150. From random matrices to quasi-periodic Jacobi matrices via orthogonal polynomials. *J. Approx. Theory* 139, no. 1-2, 269–292 (2006).
 151. Limiting Laws of Linear Eigenvalue Statistics for Unitary Invariant Matrix Models *J. Math. Phys.* 47, 103303 (2006).
 152. Condensation in a Disordered Infinite-Range Hopping Bose-Hubbard Model (with T. C. Dorlas and V. A. Zagrebnov) *J. Stat. Phys.* 124, 1137-1178 (2006).
 153. On the Law of Addition of Random Matrices: Covariance and the Central Limit Theorem for Traces of Resolvent (with V. Vasilchuk) In: *CRM Proceedings and Lecture Notes "Probability and Mathematical Physics"*, vol. 42, F. Dawson, V. Jaksic, and B. Vainberg (Eds), AMS, Providence, 2007, pp.399-415.
- 10
154. On a Random Matrix Model of Quantum Relaxation (with J. L. Lebowitz and A. Lytova) In: *Contemporary Mathematics, "Adventures in Mathematical Physics"*, vol. 447, F. Germinet, P. Hislop (Eds), AMS, Providence, 2007, pp.199 – 218.
 155. Eigenvalue distribution of random matrices In: *Random Media 2000 (Proceedings of the Mandralin Summer School, June, 2000, Poland)*, Interdisciplinary Centre of Mathematical and Computational Modeling, Warsaw, 2007, pp.93 – 206..
 156. Bulk Universality and Related Properties of Hermitian Matrix Models (with M. Shcherbina) *J. Stat. Phys.* 130, 205 – 250 (2008).
 157. On Asymptotic Behavior of Multilinear Eigenvalue Statistics of Random Matrices (with A. Lytova) *J. Stat. Phys.* 133, 871 – 882 (2008).
 158. A new approach for mutual information analysis of large dimensional multi-antenna channels (with W. Hachem, O. Khorunzhiy, P. Loubaton, J. Najim) *IEEE Trans. Inform. Theory* 54 3987–4004 (2008).
159. Orthogonal polynomials, Jacobi matrices and random matrices. In: *Integrable systems and random matrices*, 249–263, *Contemp. Math.*, 458, AMS., Providence, RI, 2008.

160. Fluctuations of matrix elements of regular functions of random Gaussian matrices. (with A. Lytova) *J. Stat. Phys.* 134, 147 – 159 (2009).
161. Central limit theorem for linear eigenvalue statistics of the Wigner and the sample covariance random matrices (with A. Lytova) *Metrika* 69, 153 – 172 (2009).
162. Pajor, A.; Pastur, L. On the limiting empirical measure of eigenvalues of the sum of rank one matrices with log-concave distribution (with A. Pajor) *Studia Math.* 195, 11 – 29 (2009).
163. Central limit theorem for linear eigenvalue statistics of random matrices with independent entries (with A. Lytova) *Annals of Probability* 37, 1778 – 1840 (2009).
164. Extremely strong convergence of eigenvalue-density of linear stochastic dynamical systems (with S. Adhikari). In: IUTAM Symposium on the Vibration Analysis of Structures with Uncertainties, 331345, IUTAM Bookser., 27, Springer, Dordrecht, 2011.
165. On connections between the theory of random operators and the theory of random matrices. *St. Petersburg Mathematical Journal* 23:1 169-199 (2011).
166. * Eigenvalue distribution of large random matrices (with M. Shcherbina). American Mathematical Society, Providence, RI, 2011, xiv+632 pp.
167. Eigenvalue-density of linear stochastic dynamical systems: A random matrix approach (with S. Adhikari, A. Lytova and J.L. Du Bois) *Journal of Sound and Vibration*, 331 (2012), pp. 1042-1058.
168. On the asymptotic properties of polynomials orthogonal with respect to varying weights and related problems of spectral theory. (with I.E. Egorova) *Algebra i Analiz* 25 (2013), no. 2, 101124.
169. Ouvry, S.; Pastur, L.; Yanovsky, A. Effect of winding edge currents (with S. Ouvry, A. Yanovsky). *Phys. Lett. A* 377 (2013), no. 10-11, 804809.
170. Ouvry, S.; Pastur, L.; Yanovsky, Thomas precession, persistent spin currents and quantum forces. *Europhysics Letters*, **106**, (2014), 18001, 6 pp.
171. Ground state of one-dimension repulsing particles on disordered lattice. *Internat. J. Modern Phys. C: Cond. Mat.*, **25**, (2014), № 8, 1450028 , p. 17 (coauthors V. Slavin, A. Krivchikov).
172. The Central Limit Theorem for linear eigenvalue statistics of the sum of independent random matrices of rank one. In: *Spectral Theory and Differential Equations*, 145–164, Amer. Math. Soc. Transl. Ser. 2, **233**, Amer. Math. Soc., Providence, RI, (2014) (coauthors O. Guedon, A. Lytova, A. Pajor).
173. Area law scaling for the entropy of disordered quasifree fermions. *Phys. Rev. Letters*, **113**, (2014), 150404, 4 pp. (coauthor V. Slavin).
174. Владимир Савельевич Буслаев (некролог). *Успехи мат. наук*, **69**:1(415) (2014), 163–168 (соавторы В.М. Бабич, А.Р. Итс, В.А. Марченко, Б.А. Пламеневский, Т.А. Суслина, Л.Д. Фаддеев, А.А. Федотов, Н.Н. Уральцева).
175. Analogues of Szego's theorem for ergodic operators. *Mat. Sb.* **206**, (2015), № 1, 103-130, translation in *Sb. Math.* **206** (2015), № 1-2, 93-119 (coauthor W. Kirsch).
176. On the equilibrium state of a small system with random matrix coupling to its environment. *J. Phys. A : Math. Gen.*, **48**, (2015), № 26, 265201, 19 pp., (coauthor J. Lebowitz).
177. Examples of random Schroedinger-type operators with non-Poissonian spectra, *Markov Processes and Related Fields*, **21**, (2015), № 3, 713 – 749 (coauthors S. Molchanov, E. Ray).
178. On a limiting distribution of singular values of random band matrices. *J. Analysis, Mathematical Physics, Geometry*, **11**, (2015), № 4, 311–332 (coauthor A. Lytova).
179. The Shannon's mutual information of a multiple antenna time and frequency dependent channels: an ergodic operator approach. *Journal of Mathematical Physics*, **56**, (2015), № 11, 113501, 29 pp., (coauthors W. Hachem, A. Moustakas).
180. Large block properties of the entanglement entropy of disordered fermions. *Journal of Statistical Physics*, **165**, (2017), № 6, 1023-1059 (coauthors A. Elgart, M. Shcherbina).
